

# Quraysh Saif

## SOFTWARE DEVELOPER

### PROJECTS

#### Full Stack Application | Career Guide

April 2023 /Capstone Project

- Built a career guide containing a quiz asking the user to answer a list of MCQ questions using React, Node, Express, REST and Web API's.
- Built my own API using express to supply the front end with career-related questions.
- Used Indeed search API that allows the user to search and apply for jobs and JavaScript functions to track and calculate the score according to each MCQ answered and provided the user with a career result.
- **Technologies used:** React, Express, REST API's, Node, JavaScript, Sass

#### Full Stack Application | InStock

March 2023, BrainStation/Group Project

- Used Knex to build MySQL database containing tables for warehouses and inventory items.
- Used Express to create the endpoints for adding, editing and deleting a warehouse, connected these endpoints to the front end.
- Collaborated using agile methodology with a group of 4 developers on Jira. Used Gitflow to complete the project efficiently.
- **Technologies used:** MySQL, Knex, React, Express, JavaScript, Sass

#### Front-End Application | iJAQ Tunes

Feb 2023, BrainStation/MINI-HACKATHON

- Used a music API from the web to allow the user to access a list of music options via a search bar.
- Designed and coded the html and CSS of the webpage. Connected the music API to the frontend using the endpoints of the documentation.
- Collaborated with team members effectively and completed the Hackathon within 5 hours.
- **Technologies used:** HTML, Sass, Web API's, JavaScript

### EDUCATION

#### BrainStation | Diploma, Software Engineering

JAN 2023 - APR 2023, TORONTO, ON

#### University of Windsor | Bachelors of Commerce Honors, Specialization in Data Analytics, Minor in Information Technology

SEP 2019 - DEC 2022, WINDSOR, ON

### SKILLS

HTML, CSS, JavaScript, Node, Knex, React, Express, MySQL, Agile Development, Document Object Model (DOM) APIs, User Authentication, OAuth, Heroku, Jest, TypeScript, GitHub

### PROFILE

I was introduced to web development through coursework during my university years and was inspired to move my career towards software engineering. I'm a problem solver, hardworking, self-motivated individual with flexibility to adapt to new situations, dedicated to increasing efficiency and motivate teams to achieve their goals. Have an innate ability to take on tasks and completing them with due diligence. Working under pressure has always ensured that results have been optimum and accurate.

### EXPERIENCE

#### Junior Financial Analyst | Qcoders

MAY 2021 - APR 2022, OAKVILLE, ON

- Flexibility, adaptability, and problem-solving skills developed by creating financial analysis for a client.
- Enhanced my team skills while working with other departments to create budget financials and submit it during a tight schedule.
